

● BEST LUXURY TWO-BERTH CARAVAN

# BAILEY UNICORN SEVILLE

● £22,399 ● 1326KG MTPLM

**U**nicorns have always easily earned the description 'luxury' for their high spec including Alde heating. But perhaps the two-berth layout in the range has been overshadowed by its longer, double-bed siblings. Until now.

The Seville gets a complete redesign for 2018, now with an L-shaped kitchen and washroom containing a separate shower cubicle.

The hob is set into the rear sector of the kitchen area, with the sink in the nearside sector. A large dresser, forward of the door, creates even more surface space. Pale grey kitchen splashbacks with the word 'Unicorn' embossed on the lower sector, are a feature of all models, with a concealed strip of LEDs above. In the Seville, the splashback forms the whole rear kitchen wall.

Concealed bright, white lighting runs below the kitchen units, too; storage comes in the form of three drawers, a slim, full-height cabinet and two large head-height cabinets. One is fitted for tableware; the other is divided into four shelf spaces.

Like all models in the 2018 Unicorn range, the Seville has a double hob cover – a glass cover, plus a second one, matching the kitchen surface, effectively creating more usable working space.

The shower room is longitudinally aligned, with the shower cubicle at the rear.

A hinge-down towel rail is suspended from the ceiling.

The Seville's wardrobe is forward of the shower room, with full garment-length hanging space plus three large shelf spaces. The big storage story continues into the dresser, with a double-doored cabinet containing four shelf spaces.

The Seville has the slimline Dometic fridge-freezer, positioned forward of the wardrobe.

#### What's special

The new Bailey Unicorn Seville is a superb option for two; light in weight at 1326kg MTPLM and with a layout and generous storage capability that gives it immense practical appeal.

We love the hinge-down towel rail in the shower, the double hob cover which increases surface space and little luxury touches including the concealed lighting running below the kitchen units.
